## **Section III: ITV Series Available by Special Request**

## Series Available by Request

Since 1998, many ITV series have been deleted from the regular broadcast schedule; however, they remain available for broadcast by special request. Although these older resources are not listed in "Section II: ITV Resources," they are still available for school use. Schools may retain their taped copies unless the series is removed from the resource list. Schools may also request that individual programs within these series be rebroadcast by ITV. These special requests should be made through your media specialist or your local DES. Please include the lesson titles, catalog numbers and lengths.

For more information or to request a special broadcast, contact Izuria Cooper at 803-737-3340 or 877-885-5272 (toll free), e-mail [icooper@scetv.org](mailto:icooper@scetv.org), or fax 803-737-3278.

## The Africans

Grades 9–12 27–31 Minutes/18 Lessons 960

Hailed as stimulating, challenging, and superbly crafted, this journey into the soul of Africa is a poetic and political adventure, illustrated with stunning cinematography filmed on location in 16 African countries. This series asks hard questions as it examines the complexities of a continent influenced by its indigenous roots, Islam, and European Christianity. From the history of Egyptian pharaohs, matriarchal social systems, and the slave trade, to the contemporary political crises of post-colonialism, famine, and apartheid, the series examines African developments from the perspective of its triple heritage. Dr. Ali Mazrui is the host and writer of the series.

## America

Grades 9–12 52–53 Minutes/13 Lessons 973

This series, narrated by Alistair Cooke, is the story of a nation inventing itself. It tells of the great and the ordinary, of triumphs and failures, and above all else, of the promise and the progress of the American experience. This resource helps students capture the flavor of this experience, relate it to their own lives, and obtain meaning and guidance for today and the future.

## America Counts

Grades 7–12 22–29 Minutes/14 Lessons 973

This series is about our life and our country. Dramatic portrayals; language explorations, including prose and poetry; multi-media experiences in the visual arts; historical documentation; and narration are included where appropriate. Lessons in this series may also be used in language arts and social studies classes. Consult the teacher's guide for specifics.

## The American South Comes of Age

Grades 9–12 27–29 Minutes/14 Lessons 975

This social studies series examines the economic, social, and political transformation of the South after World War II. An underdeveloped economy, a system of one-party politics, and a segregated system of race relations shaped the South into a unique region. This series is based on the premise that the Southern experience represented one of the greatest transformations in our history. It illuminates with particular clarity the events of that time and place. The series is recommended for advanced social studies classes.

## Anti-Smoking Specials

Grades 4–12 4–29 Minutes/10 Lessons 394.14

Produced by the American Lung Association, these programs can be used for anti-smoking campaigns in schools. Lessons 9 and 10 are from KCET's SMOKING PREVENTION SERIES, and were developed for the California Department of Health Services in order to reach an adolescent audience (junior high) with an age-specific message regarding the negative social and physical consequences of tobacco use.

## Applied Communications

Grades 9–12 12–28 Minutes/16 Lessons 370.11

Each of the 15 modules in this series includes both print and video programs that incorporate applied learning activities for the six major occupational clusters in vocational education—agriculture, business and marketing, health occupations, home economics, trade and industry, and technical. In some lessons, the first video motivates students by highlighting the importance of effective communication in the workplace. The second video lesson in all modules serves as a review and springboard to the occupation-specific application activities. Lessons 2–16 consist of two video lessons and accompany one of the 15 modules.

## Art-i-facts

Grades 3–4 14–15 Minutes/10 Lessons 701

The goals of this series are to introduce students to the artistry of the world around them; to instill an appreciation for the various forms and styles of art; and to develop skills that enhance students' artistic expression. Each lesson introduces the visual elements and artistic concepts, and offers opportunities for students to observe, analyze, experience, and create art.

## Arts Alive

Grades 6–8 15 Minutes/13 Lessons 700

Eight of the lessons in this series deal with the elements and processes of the visual arts, dance, music, and drama. For each of these, one lesson examines the distinctive elements of which it is made, and one lesson shows how these elements are combined. Five lessons focus on the role of the arts in life and the value of arts to the individual and society.

## Asian Insight

Grades 9–12 50 Minutes/6 Lessons 950

This series introduces the people and culture of the Asian Pacific. Presenting a balanced, objective interpretation of the region's history, the lessons illuminate past and present social structures, customs, beliefs, art, and architecture to give viewers a well-rounded look at this influential area. Hong Kong/Singapore, Indonesia, Japan, Malaysia, the Philippines, and Thailand are included.

**NOTE: Teachers are advised to preview these lessons for scenes and content that they feel may not be appropriate for use in their classrooms.**

6. Thailand	1230-0006	49:55

## Before the Storm

Grades 7–12 10–15 Minutes/6 Lessons 361.5

Everyone living in an area where a hurricane could occur should be prepared to take precautions to protect life and property if the storm strikes. Suitable for adults as well as students, this series teaches how to plan for preparedness. The series was produced by South Carolina ETV for the South Carolina Coastal Council, in consultation with the National Weather Service, the Hurricane Videos Council, and other agencies. Appropriate supplemental materials can be obtained from any disaster preparedness office.

## Challenge of the Unknown

Grades 4–12 18–25 Minutes/7 Lessons 510

This series shows math in a new light and helps students understand how to solve complex problems. The lessons illustrate key problem-formulation processes we all use; and show men and women wrestling with a wide range of problems in the real world, where they use mathematics as a tool to make their tasks easier.

## Conrad

Grades 6–9 14 Minutes/25 Lessons 613

This health series on disease prevention features Jason Conrad, a private detective, as the leading character. Presented in an interesting and easy-to-understand format, the content includes dental health, nutrition, physical fitness, first aid, respiratory system and problems, personal hygiene, community resources, over-the-counter drugs and prescriptions, vision, and hearing. The content presented is based on the documented need for more health information in these critical areas.

## Conversations with Artists

Grades 7–12 4–20 Minutes/31 Lessons 700

Beryl Dakers' intimate and informal conversations with artists featured on ART'S THE THING provide students with important insights and information about artists and their work. Selected from lessons produced since the ETV series began, Dakers' interviews provide teachers and students with a rare collection of vignettes of artists who either live and work in South Carolina or have roots here.

## Conversations with South Carolina Writers

Grades 4–12 14–15 Minutes/9 Lessons 800

This series consists of interviews with prominent writers who either live and work in South Carolina or have roots here. These authors, who write for children and/or young adults, discuss their works with students the age of the author's intended audience. They read excerpts from their books, explain how they write, discuss how they get their ideas and develop their storylines, and review the writing skills needed by an author.

## Descubra España

Grades 9–12 15–17 Minutes/5 Lessons 460

This second- and third-year language course, entirely in Spanish, is a resource that utilizes documentary film featuring the everyday experiences of Spanish teenagers and adults. Students witness and participate in sophisticated conversations and transactions. The series also includes interviews and scripted commentary designed to improve Spanish proficiency.

## Developing Your Career

Grades 7–12 58–60 Minutes/2 Lessons 370.11  
(10 Modules, 5–15 Minutes Each)

This series is aimed primarily at high school sophomores, but it can be a useful resource for younger and older students. The course encourages students to discover their talents and skills, to take responsibility for developing these assets, and to get involved in volunteer work as a means of discovering a career and helping the community. Students are taught planning and decision-making skills and career research techniques.

Each of the modules in this series consists of two or three video segments, and is designed to be used with classroom discussion between the segments. The broadcasts are not to be viewed during class since only a very brief message separates each segment, advising of the need to stop the cassette. These lessons should be prerecorded on a videocassette and used in conjunction with the teacher's guide, which also includes a student workbook.

**Rights:** Unlimited in perpetuity

## The Drug Avengers!

Grades 1–6 5–8 Minutes/10 Lessons 613.8 [CC]

This animated series introduces drug education by teaching easy, sensible ways to refuse drugs. Although the series was designed for use in all elementary grades, some lessons are more appropriate for the primary grades and others for the intermediate grades. The introductory episode, which introduces the series' characters, should be used in all grades. Lessons 2–5 are intended for grades 1–3, and lessons 6–10 are intended for grades 4–6.

## The Earth Revealed

Grades 9–12 29 Minutes/26 Lessons 551 [CC]

Mountains, rivers, and shorelines—seemingly constant features of the landscape—are being worn away and rebuilt by powerful, often invisible, forces. The dynamic interacting systems that drive these forces are explained. This introduction to geology explores the development of scientific theories, as well as the impact of our activities on the earth's continuing evolution. It combines documentary footage of major geological events with graphic illustrations that show how these events relate to the theory of plate tectonics. The series lets students share in the excitement of scientific discovery while providing them with a fundamental knowledge of geologic theory.

## España Viva

Grades 9–12 20–26 Minutes/15 Lessons 460

This first-year Spanish course makes learning Spanish easy and enjoyable. Rich with cultural information, the series is filled with fascinating and useful facts, filmed in a compelling manner. Each lesson is divided into two segments—the introduction teaches vocabulary and structure in context, as students meet nearly 250 Spaniards going about their daily lives, and documentary sequences take viewers to three contrasting areas. By drawing its language lessons from everyday life, it teaches students how to communicate in common situations and hold simple personal conversations, and provides insights into the Spanish culture and people.

A limited number of guides are available. One guide is available for each teacher using this series.

## Experiences in Music, Drama & Dance

Grades 7–12 24–30 Minutes/24 Lessons 707

This series features performances in music, ballet, and drama, and includes demonstrations and interviews with artists of various ages and disciplines. Each lesson is complete within itself, allowing the classroom teacher to use the lesson that best suits each particular situation. The series is offered to enrich the middle and high school curriculum in the performing arts.

## French in Action

Grades 9–12 28–29 Minutes/52 Lessons 440

This series is an introduction to the language and life of the complex French culture. The lessons feature an original story—a romantic comedy filmed in France—that is full of humor and human interest, and a dash of intrigue. The lessons also contain vignettes from France and other French-speaking countries around the world. These illustrations are used to explain new words contained in the dialogue of the story, making it easily accessible to learners. The lessons capture conversation as it actually occurs, revealing the connections between words in French and the concepts to which those words refer in the French culture. As a result, students acquire the language and come to understand the culture from the French perspective, rather than through the prism of their own language and culture.

A limited number of guides are available from Instructional Television. Schools may order, on a one-time basis, one guide for each teacher using this series.

## Global Geography

Grades 6–9 15 Minutes/10 Lessons 910

The content of this series is based on the five fundamental themes of geography described in the "Guidelines for Geographic Education"—location, place, relationships within places, movement, and regions. The themes reflect the basic ideas and concepts used in global geography. Those ideas and concepts are powerful tools that can be used by students to understand and make decisions about important issues they will face as citizens. Compelling case studies focus student attention on issues related to the themes.

## Harmony

Grades 2–3 13–30 Minutes/27 Lessons 707

This series presents experiences in the performing arts—music, drama, and dance. The major content areas are creating, responding to, and living with the arts. Including the best of student performances in the arts, as well as experiences contributed by artists of recognized excellence, this series clearly demonstrates outstanding art education experiences that can take place in the elementary classroom, as well as those that occur in communities around us.

## Images and Things

Grades 4–7 19–20 Minutes/30 Lessons 707

These programs help students to perceive qualities in people, objects, and events; and to learn to respond and use them in visual expressions. It acquaints students with aspects of visual structure, enabling them to understand what others have created. Finally, this series helps students discriminate among characteristics of art media, and shows how skill and control of media can contribute to the expressiveness of visual images.

## Introducing Biology

Grades 10–12 28–29 Minutes/29 Lessons 574

The goal of this series is to develop an appreciation of the intricate human body, stressing how it functions as a whole. The living world of animals and plants is related to human existence to help students realize the unity of all life forms. The vital role of man in the total ecology of the planet is presented.

## It's a Rainbow World

Grades K–1 12–14 Minutes/16 Lessons 372.83

Beginning social studies concepts for kindergarten and first-grade students are presented in this series produced by ITV with ETV. The lessons, based on family life, show everyday situations that five-, six- and seven-year-olds experience. As children learn about themselves, their families, and the world around them, they develop the skills necessary to understand and to participate effectively in their world.

## La Maree et ses Secrets

Grades 9–12 15–16 Minutes/5 Lessons 440

This series combines an exciting story with the language requirements of advanced first- and second-year French students. It gives insights into the aspects of French life and provides motivation for students at a variety of levels. The story follows a student, Yves, and his friend Marie-Pierre as they visit Yves' relatives in Cancale, Brittany. When a sinister old friend of Yves' uncle appears, the young couple becomes unwittingly involved in a dangerous mystery. Each lesson in the series builds the level of interest and suspense to the final surprising conclusion.

## Listen Up! For the Sounds of Your Life

Grades 4–7 29 Minutes/1 Lesson 611.85

Through animation and fast-paced visualization, this lesson explores the structure, care, and importance of the human ear. Students learn how their ears can be damaged and how to prevent it.

**Rights:** Unlimited in perpetuity

Lesson Title	Cat. No.	Length
1. Listen Up! For the Sounds of Your Life	0260-0052	28:54

## Lookin' Good

Grades 7–9 26–27 Minutes/2 Lessons 613.8 [CC]

This series is based on real incidents involving drug and alcohol use. The series spotlights refusal skills and shows how concerned students, with the help of their school and community, build a support group to resist peer pressure to use drugs. The series helps junior high students understand that their world is a difficult one, but by recognizing and talking about their fears and anxieties, they can have healthy, productive lives. Though the two dramas emphasize prevention, they also recognize that some students have already been exposed to drugs and may need treatment.

2. Lookin' Good, Part 2	4071-0011	25:48

## Mach's Gut!

Grades 9–12 15–16 Minutes/5 Lessons 430

A short, snappy course for teaching basic skills in German, this program coordinates easily with any German language course. Lessons are divided into self-contained mini-programs, each of which concentrates on a single language function—such as asking for help, describing people or places, and making arrangements to go out—in a variety of contexts. The series uses three different techniques to illustrate the workings of the German language: role-playing sketches demonstrate conversational German; documentary sequences show Austrian people using the language in everyday situations; and signpost sequences extract key words and phrases and reinforce them through graphics.

15. "The James"	4072-0143	28:50

## Mathematical Investigations

Grades 6–9 8–12 Minutes/20 Lessons 510

Each lesson in this series challenges students to ask questions or to find out about the principle being discussed. To effectively use the series, teachers should preview the lessons carefully, read the documentation, present introductory activities and discussions before class viewing, and control the playback so that programs can be stopped at the “pause for thought.” Careful planning can make this series a worthwhile addition to many areas and levels of mathematics. The open-ended teaching style makes the series more flexible for classroom use.

19. Patterns	1221-0019	10:19
20. Time Graph	1221-0020	10:56

## MeasureMetric

Grades 4–6 14–15 Minutes/12 Lessons 389

A series on metric education, this resource has three major areas—readiness, awareness, and conceptual development. Lesson design is process-oriented with measurement concepts developed in a sequential format.

**Rights:** Unlimited in perpetuity

Lesson Title	Cat. No.	Length
1. The Greatest Measurement Show	0335-0001	14:32
2. Length, Part 1	0335-0002	14:31
3. Length, Part 2	0335-0003	14:31
4. Length, Part 3	0335-0004	14:32
5. Area, Part 1	0335-0005	14:47
6. Area, Part 2	0335-0006	14:45
7. Area, Part 3	0335-0007	14:40
8. Volume, Part 1	0335-0008	14:46
9. Volume, Part 2	0335-0009	14:30
10. Volume, Part 3	0335-0010	13:06
11. Mass, Part 1	0335-0011	14:31
12. Mass, Part 2	0335-0012	14:30

## The Mechanical Universe

Grades 9–12 29–30 Minutes/26 Lessons 531

Based on the physics course developed by Dr. David Goodstein, this series was introduced at the California Institute of Technology in 1979. Filmed in such locations as Newton's home and Galileo's haunts in Italy, the series uses intricate sets, demonstration experiments, and computer animation. Because calculus is used in the series, some lessons may also be useful in mathematics classes.

20. Torques and Gyroscopes	1190-0020	29:31
21. Kepler's Three Laws	1190-0021	29:36
22. Kepler Problem	1190-0022	29:35
23. Energy and Eccentricity	1190-0023	29:31
24. Navigating in Space	1190-0024	29:31
25. From Kepler to Einstein	1190-0025	29:30
26. Harmony of the Spheres	1190-0026	29:31

## The Mechanical Universe...and Beyond

Grades 9–12 29–30 Minutes/26 Lessons 531

A visually splendid introductory physics course, this series combines state-of-the-art computer graphics by NASA's celebrated Jim Blinn and dramatic reenactments of great moments in the history of science with introductory lectures by Cal Tech professor David L. Goodstein. This in-depth adventure of the mind traces the interaction of ideas from Aristotle to Einstein to explain the theories of such intellectual giants as Copernicus, Kepler, and Newton. The lessons clearly explain and illustrate classical mechanics, electricity and magnetism, relativity, waves and optics, heat and thermodynamics, and modern physics.

# Mulligan Stew

Grades 4–7 29 Minutes/6 Lessons 349

Produced by the National 4-H Clubs, these programs teach students about the benefits of good nutrition. The lesson content includes calorie counting, fad dieting, what food does, planning, buying and preparing, digestion, additives, natural foods, and more—knowledge of which helps the student be a healthier person.

## The New Pacific

Grades 7–12 47–60 Minutes/4 Lessons 990

The Pacific Basin, supporting a third of the world's population, contains a diversity of race, language, and culture. With the devel-

opment of trade, tourism, and telecommunications, the people of the Pacific are facing new challenges to their traditional lifestyles. These programs explore the cultural, historical, economic, and political facets of this colorful and influential sphere of the world.

**NOTE: Teachers are advised to preview these lessons for scenes and content that they feel may not be appropriate for use in their classrooms.**

**Rights:** Unlimited in perpetuity

Lesson Title	Cat. No.	Length

2. Echoes of War	1228-0102	49:36
3. Fifty Ways to Get Enlightened	1228-0103	59:50
4. Shadow of the Rising Sun	1228-0104	47:10

## The Novel

Grades 9–12 14–15 Minutes/16 Lessons 808.3

The overall goals of this series are twofold: (1) to stimulate student interest in reading representative novels; and (2) to enable students to recognize various literary elements, devices, and techniques employed by masters of the genre. Each lesson emphasizes a particular literary concept so that students can learn to interpret and understand the novel through the significant elements that give it form and meaning. Concepts explored in the series include characterization (development, allegory, setting); plot (conflict, satire, setting); and character development (conflict, symbolism).

**NOTE: Teachers are advised to preview the three lessons marked with an asterisk for scenes and content that they feel may not be appropriate for use in their classrooms.**

**Rights:** Unlimited broadcast/off-air record (no tape duplication)

## The Oil Kingdoms

Grades 9–12 58 Minutes/3 Lessons 953.6

The discovery of oil was merely another chapter in the colorful story of the Persian Gulf. This three-part series offers a fascinating look at the history of

five small countries—Kuwait, Qatar, Bahrain, the United Arab Emirates, and Oman—and their transformation from Biblical times to today's extremely wealthy societies.

## Pass It Along

Grades 4–5 13–15 Minutes/8 Lessons 707

Every lesson in this series features an artist who expresses himself in a different medium, yet each is concerned with and inspired by the natural beauty of our environment. Topics covered are photography, dance, performance, painting, architecture, writing, and music. The series blends scientific, artistic, and environmental concepts.

## Physical Science Learning Lab

Grades 5–8 15 Minutes/4 Lessons 530

This series provides a clear introduction to the basic concepts of matter, taking particular care to show beginning science students the relationships among matter, mass, properties, elements, compounds, molecules, atoms, protons, neutrons, and electrons. Emphasis is placed on the idea that matter is composed of particles in motion and that science is both a process of investigation and a store of knowledge. Students learn that energy is more than electric power and expensive fossil fuels. Magnets, models, illustrations, and animation lead students to study spinning electrons and domains of atoms.

4. Magnetism and Fields of Force	2159-0004	15:00

## Picking Your Path

Grades 3–6 8–9 Minutes/5 Lessons 371.42

This series of short introductions to the 14 basic career clusters serves as a springboard for the discussion of various careers that students may pursue. Teachers will find these lessons valuable resources in helping students pursue their interests so that they develop skills and knowledge in paths that appeal to them for possible career development.

## Planet Earth

Grades 8–12 28–30 Minutes/14 Lessons 509

Designed for use in all disciplines concerned with earth and planetary science, this series examines the fundamentals of geophysics, revealing astounding scientific insights and discoveries. Internationally known scientists share their theories about the formation of the earth, its oceans and climate, and the universe beyond. The series focuses on geologic time, oceanography, climatology, mineral and energy resources, the sun, comparative planetology, and the earth's future. Computer graphics and special effects accompany footage shot on all seven continents, in the oceans, and in outer space.

## Principles of Technology

Grades 10–12 32–54 Minutes/14 Lessons 620

This series includes video presentations and hands-on laboratory exercises to make learning effective and appealing for the vocational student. In a concrete and practical manner, it shows how technical concepts and principles apply to the mechanical, thermal, electrical, and fluidal (i.e., hydraulic and pneumatic) systems that are the foundation of high technology.

## Private Victories

Grades 10–12 28–29 Minutes/4 Lessons 613.8 [CC]

This series follows the lives of a few high school students who turn to drugs. Through the course of the series, each student discovers that drug abuse can have a devastating effect on the lives of users and others close to them. This series emphasizes that it's possible for young people to achieve private victories by caring enough about themselves to reject drugs. It relates the dangers of drugs clearly and concisely, and demonstrates that those who decide against using drugs can influence friends to do the same.

4. Todd	1135-0018	28:49

## Psychology 101

Grades 11–12 28–29 Minutes/35 Lessons 130

Elementary psychology is available to juniors and seniors for high school or college credit. High school teachers can use this resource as part of their regular psychology course. Through the University of South Carolina's Department of Psychology, seniors may earn three hours of college credit if they are in a participating high school where a concurrent teacher certified in social studies or psychology provides instruction supplemental to the videotapes. Workshops will be scheduled to prepare concurrent teachers for their participation.

Examinations for measuring student achievement for university credit are prepared and evaluated by USC's Department of Psychology. A student not planning to attend USC can receive credit for the course at other colleges and universities in the state by either transfer of the credit or by validation of the credit through an examination. Clemson University requires a challenge examination; other state schools have allowed the credits to be transferred.

**Rights:** Unlimited for school year (no summer school rights)

## Railroad Safety

Grades 3–12 7–18 Minutes/6 Lessons 363.122

May is Railroad Safety Month. This series consists of several resources to help promote awareness of railroad safety. The Palmetto Chapter of the National Safety Council, which sponsors Railroad Safety Month and Operation Lifesaver, has provided these lessons dealing with safety issues around train yards, on railroad tracks and trestles, and at railroad crossings.

**Rights:** Unlimited

30. Sandlapper's Corner in Review	0258-0030	13:26

## Self Incorporated

Grades 5–8 14–15 Minutes/15 Lessons 131

This series focuses on the emotional difficulties of adolescents and deals with such topics as dating, feelings associated with psychological changes, mood changes, and pressures to achieve. These themes are explored through dramatizations that are generally open-ended, stimulating classroom discussions and activities. It is a companion course to the INSIDE/OUT series.

## The Shaping of Space

Grades 7–12 22 Minutes/1 Lesson 701

Using fast-moving visualization, this lesson explores with three elementary-school children the meaning of their personal space, their space environment, and how and why architects shape space. These children then share their feelings about various spaces.

**Rights:** Unlimited in perpetuity

Lesson Title	Cat. No.	Length
1. The Shaping of Space	0260-0009	21:30

## The Short Story

Grades 9–12 14–33 Minutes/18 Lessons 808

This series presents works of the best American short-story writers, and compares their works with those of the best writers from other countries. Humor, suspense, allegory, romance, reality, and morality are themes in many of the stories.

Two of the short stories, “Chickamauga” and “An Occurrence at Owl Creek Bridge” by Ambrose Bierce, are about the Civil War and may be used to supplement the UNITED STATES HISTORY series.

**NOTE:** Teachers are advised to preview lessons 10 and 11 for scenes and content that they feel may not be appropriate for use in their classrooms.

**Rights:** Unlimited broadcast/off-air record (no tape duplication)

## Soup to Nuts

Grades 7–8 13–15 Minutes/10 Lessons 612.3

This series is designed to improve students' health by changing their eating habits. To accomplish this goal, the series leads students through the processes of exploring values, attitudes, and actions; acquiring knowledge and skills; exploring alternatives, risks, and outcomes; and making decisions for life.

**Rights:** Unlimited in perpetuity

## Starfinder

Grades 7–10 14–15 Minutes/31 Lessons 520

To be shared with researchers around the world, data from NASA's Hubble Space Telescope (HST) was relayed instantly to the Space Telescope Science Institute. Maryland INTEC formed a partnership with the Institute to prepare video reports based on this exciting research. This series is a compilation of these video reports. Each lesson in the series consists of three components: “View from HST” highlights important discoveries or especially dramatic images from the telescope; “Science Links” links specific physics or earth science concepts with the working of the universe; and “People Behind HST” profiles jobs of people associated with HST and the Space Telescope Science Institute.

**Straight Up!** [CC]  
 Grades 4–6 13–16 Minutes/6 Lessons 613.8

Actor Lou Gossett, Jr. and TV star Chad Allen appear in this story about a boy named Ben who wants to be accepted by his friends who are tempting him to try alcohol and marijuana. During Ben’s struggles to resist drugs, he winds up on what he thinks is a freight elevator, but it’s really a “fate” elevator. Help arrives in the form of Cosmo, who guides Ben through a maze of adventures. Ben learns valuable lessons about drugs, as well as developing coping skills, building self-esteem, and resisting peer pressure.

**ThinkAbout**  
 Grades 5–6 14–15 Minutes/60 Lessons 160

These programs develop and strengthen students’ reasoning and study skills, and improve and extend their mathematics and communication skills. The series blends skills from various subject areas and presents them within a framework based on the reasoning process. Situations common to the lives of fifth- and sixth-graders are the context for learning. Lessons and printed materials motivate viewers to participate actively in the learning process, so that skills are acquired by students and not imposed on them.

## Too Much, Too Little

Grades 9–12 25 Minutes/1 Lesson 336.2

This single program is about money, how the nation's money supply affects the economy, and why Congress established the Federal Reserve System. The lesson traces our nation's monetary system from colonial times to the present. Highlights include the issuing of paper money by the Continental Congress; the constitutional provision for the minting of coins; the chartering of banks authorized to issue paper money backed by gold and silver; the economic and financial requirements of the Civil War and the issuing of "greenbacks"; the Bryan-McKinley campaign and the dispute over gold or silver as the monetary standard; the Panic of 1907; and the 1913 signing of the Federal Reserve Act by Woodrow Wilson. This lesson also includes a contemporary story of a young man who learns about money and banking when he obtains a loan—cosigned by Dad—for his first car.

## Trade-Offs

Grades 4–6 18–20 Minutes/15 Lessons 338

This series increases students' knowledge of economics, builds skills in using economic concepts, and motivates an interest in the economic world. The series helps students to better understand their roles in a changing economic environment; to think through economic problems in order to reach logical conclusions; and to be aware of the costs and benefits involved in economic decision-making.

## Under the Yellow Balloon

Grades 2–3 12–15 Minutes/16 Lessons 372

Produced by Dr. Sandra G. Thomas, this resource presents basic social studies concepts in a developmental manner. Beginning with the child, an expanding environment approach is used. The child, his family and home, the community, the state, the country, and the world are all interrelated to present concepts from each of the social studies disciplines. The lessons do not use a host or on-camera teacher, but employ a variety of formats. Children are used in dramatic vignettes.

## Ways of the Law

Grades 10–12 17–23 Minutes/15 Lessons 348.75

These law-related lessons acquaint high school students with those areas of the law with which they are likely to come into contact as adults. The overall objective of the series is to enhance the survival skills of these soon-to-be adults, making them more productive citizens.

## The Western Tradition

Grades 9–12 27–28 Minutes/52 Lessons [CC] 900

This encyclopedic series is illustrated with more than 2,700 paintings, sculptures, and other records from the past, compiled by the Metropolitan Museum of Art. The eloquent historian Eugene Weber guides viewers through centuries of politics, literature, economics, industry, agriculture, art, philosophy, and the daily lives of ordinary people. Students discover the history that has shaped the modern world.

## WhatAbout

Grades 5–8 14–15 Minutes/12 Lessons 500

This series blends skills, concepts, attitudes, and scientific understanding into a framework that emphasizes process and the concept of change. Each lesson presents this interaction while emphasizing one particular skill. Although lessons are sequenced in a manner that suggests the logical flow of scientific inquiry, the implication that science follows a lock-step process is avoided.

## Where Are We?

[CC]

Grades 2–4 12–14 Minutes/6 Lessons

912

Produced by Dr. Sandra G. Thomas, this series presents basic geographic concepts and skills related to maps and globes, cardinal directions, relative location, place, and physical geography. The continuing storyline follows a girl and her brother in need-to-know situations as they receive help with these concepts and skills from Spaniel Boone, their magical toy and friend. Each lesson is interspersed with direct teaching segments that use a variety of eye-catching visuals, animation, and fast-paced production techniques to present the geographic concepts and skills.

**Rights:** Unlimited in perpetuity

## Widen Your Choices

[CC]

Grades 4–8 15–17 Minutes/3 Lessons

370

The purpose of this series is to encourage and motivate middle school students to consider a college education—to realize that planning for college now opens up choices later. The focus is on the importance of having a goal, even if it changes later, and taking the responsibility of planning and working toward that goal.

**Rights:** Unlimited

## The World

Grades 11–12 26 Minutes/26 Lessons

909

This series offers a global and geographical view of the human story. Based on "The Times Atlas of World History," the series increases students' understanding of our planet, from the dawn of mankind and the spread of agriculture to the great classical civilizations of Greece and Rome. It also covers the development of Africa; the impact of the great religions, such as Islam and Christianity; the Chinese Empire; the Ottoman and Mongol empires; the development of the United States and Russia, all the way to the Great Depression; the World Wars; the Cold War; and the division of the world into rich and poor nations.

**Rights:** Unlimited

## World of Work

Grades 9–12 55–56 Minutes/2 Lessons 371.42 [CC]

“Is technology stealing your job?” “Where will you work tomorrow?” Lifelong learning is taking on new meaning as accelerating changes affect our careers. These two programs provide valuable information and insight into the impact of rapidly developing technologies that affect how we work, where we work, and the kind of work we do.

**Rights:** Unlimited in perpetuity

## World Wise Schools

Grades 4–9 10–25 Minutes/13 Lessons 361.6 [CC]

World Wise Schools is a program developed by the Peace Corps to provide volunteer-to-school linkages between Peace Corps volunteers and participating schools. In an effort to make South Carolina a World Wise state, the videos produced by the Peace Corps are being shared statewide by the Office of Instructional Technology. Each lesson in the series focuses on the people, geography, and culture of a specific country and the Peace Corps volunteers who work there.

Participating schools can request a Peace Corps volunteer/classroom linkage and exchange directly from the Peace Corps. For information, call World Wise Schools at 202-692-1450 or link to “global education” from their Web site at [www.peacecorps.gov](http://www.peacecorps.gov).

## Writers' Circle

Grades 7–12 27–29 Minutes/117 Lessons 800 SL [CC]

Produced by WRJA-TV in Sumter, this series features authors with local ties. Host Patti Just talks with poets, playwrights, and fiction writers about a wide variety of subjects. Authors discuss their own personal creative writing process—from idea to manuscript to finished work.

## Your Choice/Community Outreach Programs

Grades 5–6 30 Minutes/3 Lessons 613.8

This community outreach series for concerned adults supports YOUR CHOICE...OUR CHANCE by providing a resource for creating drug-free communities, schools, families, and individuals. The three community programs feature successful prevention programs in three states, provide models for community organization, and show parent training.

**Rights:** Unlimited in perpetuity

2. Where Do You Go from Here?	4067-0002	29:47
3. How Do You Prevent the Problem?	4067-0003	29:50

**Your Choice...Our Chance** [CC]  
 Grades 5–6 14–15 Minutes/10 Lessons 613.8

Within a comprehensive health education curriculum, this series focuses on knowledge, attitudes, and behaviors that influence drug use. Its prevention strategies are founded on validated psychosocial principles that acknowledge the importance of social influences on students. The lessons are designed to help students develop personal and social skills, learn to make decisions, and improve self-concept. Dramatic episodes feature fifth- and sixth-graders in realistic school, family, and peer group situations.

**NOTE: Some of these lessons may need to be reviewed by the district’s comprehensive health committee.**

**Rights:** Unlimited in perpetuity

**Your Future. Your Choice. Careers in Allied Health**  
 Grades 11–12 15 Minutes/1 Lesson 362.1

Focusing on four young professionals working in the areas of ultrasound, medical technology, occupational therapy, and nutrition/dietetics, this lesson identifies career choices in the allied health field. Other allied health careers are discussed by students preparing for these careers.

**Rights:** Unlimited broadcast/off-air record (no tape duplication)

Lesson Title	Cat. No.	Length
1. Your Future, Your Choice: Careers in Allied Health	0260-0304	14:58

**Don’t Forget About Series Available “By Request”**

Since 1998, more than 100 ITV series have been deleted from the regular broadcast schedule; however, they remain available for broadcast by request.

Keep in mind that many of the titles that were available last year have now been moved to By Request. If you are searching for a particular title and it is not listed as a resource or on the list of removed resources, chances are it is still available by request. These series are included in The Curriculum Overview section starting on page 9. Descriptions start on page 77.

Schools may retain their taped copies unless the series is removed from the resource list. Schools may also request that individual programs within these series be rebroadcast by ITV. These requests should be made through your media specialist or your local DES (which may already have the program on the shelf). Please include the lesson titles, catalog numbers, and lengths, which can be found in Section III.

**REMEMBER!!**

Many of the titles in this book are also available on demand through your computer via *StreamlineSC*. Each of these is marked with an *SL* near the series title. For more information about *StreamlineSC*, see page 7 or go to [etv.streamlinesc.org](http://etv.streamlinesc.org).

**ALSO!**

Your DES may already have these titles on hand! See pages 104–105 for information on how to contact the DES that serves your district.
